

# **CMSI 4072 — Project Status Sheet**

Spring 2026

## **Accomplishments**

- Auto Book Covers : Integrated Open Library API for automatic cover images on 25 pre-seeded books
- Enhanced Dashboard : 8 comprehensive reading stats including favorite genre, average rating, and reading progress metrics
- Input Validation : Email regex validation, username requirements (3-50 chars, alphanumeric), and password strength checks
- Duplicate Detection : Automatic detection of duplicate books by ISBN or title+author to maintain clean database
- Error Handling Production-ready try-catch blocks with graceful error messages and automatic database rollback

## **Scheduled Tasks**

- Progress Tracking: Book pages field added for accurate reading progress monitoring
- Public Shelf Access: Read-only viewing of other users' shelves for true social reading experience
- Production Security: Environment-based debug mode and comprehensive input sanitization

## **Noteworthy Risks**

- Email Notifications: Not implemented (requires third-party service integration and ongoing costs)
- Performance Testing Activity feed not stress-tested with 100+ followed users
- Email Verification: User registration does not verify email addresses
